

## MINI 1 WAY

### Data logger for Single Trip (not rewritable)

Mini 1 WAY is a 1-channel data logger with internal temperature sensor with a working range from -40°C to 80°C, direct connection to PC and automatic creation of a PDF file with the recorded data. The logger can store 13,000 measurements with an interval of 1 second to 24 hours. It can be pre-programmed with predefined alarm thresholds or can be programmed on request, according to customer specifications. Supplied in a pack of 10 pieces.

### TECHNICAL FEATURES

<b>Measured size:</b>	Temperature
<b>Sensor:</b>	Internal
<b>Measuring range:</b>	-40 ÷ 80°C
<b>Resolution:</b>	0,01°C
<b>Accuracy:</b>	± 0,3°C from -10°C to +80°C   ± 0,5°C from -40°C to -10°C
<b>Storage:</b>	13.000 readings
<b>Output:</b>	USB for direct connection to PC
<b>Software:</b>	free download
<b>IP Rating:</b>	IP65 - The logger is supplied inside a sealed sachet which guarantees watertightness
<b>Battery:</b>	3 V lithium battery, not replaceable
<b>Dimensions:</b>	78 x 48 x 9 mm
<b>Weight:</b>	16 g
<b>Quantity:</b>	Supplied in a pack of 10 pieces
